Chinese Application No. 92218176.4, filed on June 22, 1992, Publication No. CN2139030Y, published on July 28, 1993. The abstract in English is as follows:.

*This is a kind of roller frame which has a roller head 4, a valve 3, a vessel used for storing paint and a suction hose 2. During operation paint material which has been pumped and stored in the vessel will be pressed into the roller head. Compared to the existing paint rollers, this helps to paint more evenly and to prevent from dripping so that the paint material will be saved. It is easy to operate and can be widely used in paint works in hotels, hospitals, large warehouses and so on.*
